

JULIANA

CUSHTAIL

Since we can't think of any 200 pound women with a penchant for breaking bikes (that's not to say there aren't any out there), it seemed like overkill to just do a makeover on the Chameleon. Instead, we built the Juliana HT. Featuring all the geometry tweaks of the Juliana SL, the HT also benefits from lighter tubing and a completely redesigned rear triangle. The overkill chain and seatstays of the Chameleon have been replaced with a much lighter rear triangle which, aside from offering buckets of mud clearance, is far less likely to rattle teeth out of the heads of 120 pound riders when jamming over rough ground. The bike is a feather. The 200 pound, dirt jumping, bike wrecking, hairy knuckled ogres are all jealous.

WOMENS HARDTAIL

- Custom Butted 7005 Superlight Tubeset
- Women Specific Geometry
- Maximum Standover
- Disc Ready
